**ALWAYS ASK FOR
GENUINE PARTS,
DON'T TAKE THE RISK:**

PROTECT YOUR INVESTMENT

Parts with similar looks don't always perform like Genuine Parts. Genuine Kubota Parts are the best way to protect your investment in and out of warranty.

KUBOTA TOUGH AND DEPENDABLE

These are the same parts used on new factory-built Kubota engines to maintain our top performance.

AN EXACT FIT

Kubota Genuine Parts are engineered to fit the exacting specifications for each Kubota engine.

EMISSIONS CERTIFIED

Keep our Kubota Engine Emissions Certified with Genuine Kubota Parts.

TIME IS MONEY!

When your equipment is down for repairs, you're not earning any money. Kubota has earned the long standing reputation of providing top quality industrial engines for commercial equipment worldwide. Top quality, tough and dependable engines significantly reduce your risk of equipment downtime.

THAT GOES FOR GENUINE PARTS TOO!

Why take the risk? It's just not worth the few dollars potentially saved.

Inferior filters, gaskets and other replacement parts may initially cost less, but you run the risk of extra wear and tear and potential engine damage.

**THE EASY
WAY TO
ORDER PARTS:**

Getting the right information will assure you of receiving the correct part and fast delivery.

1 Provide your Kubota Engine America Dealer with your engine model information. (Refer to Model Identification Chart)

-Model Number
-Serial Number
-Model Code (if applicable)

2 Also provide the application and product brand name.

3 Remember to insist on Genuine Kubota Engine parts.

FOLLOW THESE SIMPLE STEPS WHEN ORDERING PARTS FOR YOUR KUBOTA POWERED EQUIPMENT.
